

**DESCRIPTION**

**ProShield Standard-F** is a 2.75 ounce stitch bonded style polyester fabric with a firm finish used in the reinforcement of cold process roofing systems. It is also used as a flashing reinforcement with mastics and elastomerics. The Standard - F fabric has good strength and elongation making it an excellent reinforcement for water base cold process and maintenance roof systems.

**ProShield Standard-F** has a firm but pliable finish. It will provide good conformability on smooth or semi-smooth surfaces. **PCT-F** works well when used over smooth or cap sheet surfaces. As it has fewer stitches per inch it will have fewer wrinkles, will lay straighter and smoother during application.

**Standard -F** is available in: 6" X324', 12" X 324', 20" X 324' or 40" x 324' (10 square rolls)

**PROPERTIES**

Weight		2.75 Ounce
Thickness		.25 inch
Tensile Avg.	ASTM D 1682	41 lbs. **
Elongation	ASTM D 1682	25%
Burst Strength	ASTM D 1682	127 lbs.
Trapezoid Tear Strength	ASTM D 1682	14 lbs. **
