

ProShield Standard –S

Polyester Fabric – Soft Finish

TECHNICAL DATA SHEET

DESCRIPTION

ProShield Standard-S is a 2.75 – 3.0 ounce/yd.² stitch bonded style polyester fabric with a soft finish used in the reinforcement of cold process roofing systems. Similar to a Tietex T325 fabric.

The **Standard –S** fabric has good strength and elongation making it an excellent reinforcement for water base cold process and maintenance roof systems.

ProShield Standard-S works well when used over vacuumed, spudded or filled gravel surfaces. It has fewer stitches per inch, which allows for better wetability providing full saturation.

Standard –F is available in: 40" x 324' (10 square rolls)

PROPERTIES

Weight		2.75 – 3.00 Ounce/yd. ²
Thickness		1.9 mil
